Department of Anthropology  
207 Anthropology Building  
1557 Dickey Drive  
Atlanta, GA 30322  
Phone: 404.727.5248,  
Email: Chadley@emory.edu

**EDUCATION**

Ph.D. Anthropology (Biological) with a Designated Emphasis in International Nutrition. Department of Anthropology and Program in International Nutrition, University of California, Davis. Sept., 2003

M.A. Anthropology. Department of Anthropology, University of California, Davis. 2002

B.S. Anthropology, Department of Anthropology, University of Utah. 1998

**POSITIONS AND EMPLOYMENT**

2007- Assistant professor, Department of Anthropology, Emory University.

2005- Robert Wood Johnson Health and Society Scholar. Department of Social Epidemiology and  
2007 Population Health. University of Michigan.

2005- Adjunct Assistant Professor of Population Studies. Brown University.  
present

2003 – Mellon Postdoctoral Research Fellow in Anthropological Demography. Brown University.  
2005

1998 – Research assistant and teaching assistant, Department of Anthropology, University of  
2002 California, Davis.

**HONORS, AWARDS, AND GRANTS FOR RESEARCH**

2008 Food insecurity, adult mental health, and children's development in Ethiopia. University Research Committee. Emory University.

2007 National Science Foundation

Poverty, social change, and shifting expectations: The makings of mental health disorders among Ethiopian adolescents (with D. Mains, Washington University).

2006 Robert Wood Johnson Health and Society Scholars Program Grant

Title: Social context and the consequences of disasters: A mixed methods approach to identifying underlying vulnerabilities and capacities (with S. Galea, U of M)

2006 Michigan Interdisciplinary Center on Social Inequalities, Mind, and Body

Title: Determinants of Child Health and Development in Ethiopia (With S. Galea, J. Cowan)

- 2005 National Institute of Child Health and Human Development  
Title: Ethiopian adolescents' child feeding knowledge and intentions
- 2005 National Science Foundation  
Title: Food insecurity among resettled African refugees (With C. Patil, USF).
- 2004 Economic Research Service/USDA/UCDavis  
Title: Food insecurity among recently resettled Liberian refugees
- 2004 National Science Foundation  
Title: Childcare in challenging environments: Identifying barriers to optimal child feeding practices in rural Tanzania
- 2004 Mellon center seed grant  
Title: Dietary practices among resettled refugees – A pilot study
- 2003 Juan Comas prize for best student paper presented at the 72<sup>nd</sup> annual meeting of the American Physical Anthropologists
- 2002 University of California, Davis. Travel Award
- 2002 University of California, Davis. Summer Research Fellowship
- 2002 University of California, Davis. Dissertation Year Fellowship
- 2000 University of California, Davis Humanities Graduate Research Award  
Title: Assessing the impact of paternal contributions to the household on child health
- 2000 University of California, Davis. Block grant award. Out of state tuition wavier
- 2000 National Science Foundation Dissertation Improvement Grant.  
Title: Doctoral dissertation research: An evolutionary ecology approach to determining women's bargaining power and its effect on child health in rural Tanzania
- 2000 Gifford Center Small Grants Program for Research on Population, Food, and the Environment.  
Title: Identifying the determinants of maternal bargaining power and its effect on child health in rural Tanzania
- 1999 NSF Pre-Doctoral Fellowship Competition- Honorable Mention
- 1999 Animal Behavior Research Training Grant. Preliminary research in Tanzania.
- 1998 University of California, Davis. Block Grant Fellowship
- 1997 Robert Anderson Award for Outstanding Undergraduate Anthropology Student, University of Utah

## MANUSCRIPTS (under review)

1. Lindstrom, D. Tefera Belachew, **Craig Hadley**, Dennis Hogan, Fasil Tessema. Survey Estimates of Risky Sexual Behaviors among Ethiopian Youth: Improved Estimates Using a Non-Verbal Response Card.
2. **Hadley et al.** Dietary difficulty is associated with food insecurity in resettled refugees.
3. Osypuk, T., Diez Roux, A. **Hadley, C.** and N. Kandula. *Submitted*. Is residence in an immigrant enclave associated with healthier behaviors?
4. Brewis, A., **Hadley, C.**, and I. Pike. *Submitted*. Women's status and embodied stress in a post-Soviet Muslim state.
5. **Hadley, C.** and A. Wutich. *Revise and Resubmit*. Experience-based measures of food and water security: Biocultural approaches to grounded measures of insecurity.
6. Patil, C. Maripuu, T., **Hadley, C.**, and D. Sellen. *Submitted*. A Systematic Review of Gaps in Health Research among Refugees Resettled in Canada. *Can J of Pub Hlth*.

## **Primary research ongoing or completed during the last three years**

### **1. Social context and the consequences of disasters: A mixed methods approach to identifying underlying vulnerabilities and capacities**

Funding: The Robert Wood Johnson Foundation Health and Society Scholar Program

Period: 2006-2007.

Role: Principal investigator (w/ Sandro Galea)

### **2. Adult neuropsychiatric function and children's growth and development**

Funding: The interdisciplinary center for the study of inequality in mind and body

Period: 2006-2007.

Role: Principal investigator (w/ Sandro Galea, John Cowan, Ayalew Tegegn, & Fasil Tessema)

### **3. Adolescents' child rearing knowledge and expectations**

Funding: National Institutes of Health

Period: 2006-2008.

Role: Principal investigator

### **4. Food insecurity among resettled African refugee communities**

Funding agency: National Science Foundation

Period: 2006-2008.

Role: Principal investigator

This is a prospective study of West African, East African, and Eastern European refugees who have been resettled in the USA as part of the USA's refugee resettlement program. Principal study aims are to examine the occurrence and correlates of food insecurity, mental health outcomes, and chronic diseases and obesity. Conceptually we hope to explore a three stage model of refugee health and wellbeing that views current health as the outcome of life in the country of origin, health and wellbeing during transit and forced migration, and given current living conditions in the USA. We hope to identify the social determinants of health and examine how cultural differences between groups may attenuate or amplify associations. This project entails a set of mixed methods including in-depth interviews, anthropometry, and questionnaires.

### **4. Childcare in challenging environments – Food security and child feeding practices in rural Tanzania – A prospective study**

Funding agencies: National Science Foundation Cultural Anthropology, Gifford Center for Population Issues, NSF–Cultural Anthropology (Dissertation improvement award), University of California, Davis

Period: 2000-ongoing

Role: Principal investigator

A primary aim of this research, which began as dissertation research, is to examine the influence of seasonal household food insecurity on maternal and child health among two different ethnic groups in a rural agricultural village in Tanzania. A second objective is to explore between-group differences in infant and child feeding practices, and explore the cultural and economic causes of these differences, and their impact on child growth. Methods of data collection include focus

groups, surveys, and anthropometric measures. A key result to emerge thus far is that all children grow more poorly in the “hunger” season, although this is not related to household food insecurity, which suggests that household level coping mechanisms are adequate to buffer children from food insecurity, but not from the greater prevalence of disease in this season. Another key finding is that large between ethnic group differences in children’s growth are strongly associated with different infant and child feeding practices, and focus groups revealed very different attitudes towards the proper time of introduction of non-breastmilk food items. Hadley is the PI on this project and is responsible for all aspects of design, analysis, and writing-up of results

### **5. Dietary practices and household food insecurity among recently arrived Liberian refugees: A pilot study**

Funding agencies: Mellon Foundation, United States Department of Agriculture/ERS

Period: 2004-ongoing

Role: Principal investigator

This project builds on a recently completed pilot study that investigated the prevalence of food insecurity and child hunger among resettled Liberian refugees. A large study has recently begun. Primary aims of this research are to assess the prevalence of household food insecurity and child hunger among recently resettled refugees in the USA. Secondary objectives are to assess dietary intake and factors influencing poor dietary intake, food insecurity, and obesity. Additional objectives are to assess the relative impact of economics, informational constraints, and cultural preferences on dietary intake and shopping patterns. Methods of data collection include focus groups, survey, and anthropometry. Hadley initiated the study, designed the questionnaire, and trained interviewers. He is the sole investigator on this project, and therefore is involved in all aspects of design, analysis, and writing-up of results.

### **6. A study of the adolescent life course in Jimma zone, Ethiopia**

Funding agencies: Packard Foundation, Mellon

Period: 2003-ongoing

Role: Co-investigator, PI on NIH R03

This five year longitudinal study investigates key transitions in the adolescent life course among a diverse sample of 2100 adolescents living in southwest Ethiopia. These individuals, aged 13-17 at baseline, will be followed up at six month intervals. Primary objectives are to better understand key transitions, and predictors of these transitions, in the life course including the transition out of school, in to and out of employment, into parenthood, and in to and out of states of good health. Secondary objectives are to test causal models linking nutritional status, food security and support networks and explore intergenerational transmission of ill health. This is a collaborative project with Jimma University (Ethiopia). Hadley has been involved in all aspects of study and sample design. He has spent extensive amounts of time in Ethiopia working closely with colleagues at Jimma University in the planning and execution of this unique project.

### **7. Other anthropological field experience:**

Research assistant Meriam Ethnographic Research Project. Principal investigator Eric Smith (with Rebecca Bliege Bird and Doug Bird); archeological field surveys.
